**YOUR
ECO-FRIENDLY
ALTERNATIVE
TO TIMBER**

**SAVE TREES
SAVE THE ENVIRONMENT
SAVE OUR PLANET
USE WOODONALI**

EVERYTHING WE
DO, WE BELIEVE
IN THINKING
DIFFERENTLY AND
CHANGING THE
WORLD TO BE A
BETTER PLACE

WOODonALI is proud to introduce a unique system of decorative powder coating. Our wood on aluminium decoration process can easily transform the appearance of any aluminium and metal product into a wood grain finish.

Aluminium that looks like wood with **MORE WEATHER PROTECTION, MORE DESIGN OPTIONS, TIMELESS APPEAL, GREENER, SAFER, STRONGER AND EASIER TO USE and MAINTAIN.**

OUR MISSION

Aluminum is among the most environmentally friendly metals on the planet. On a percentage basis, it is the most recycled of any industrial metal. Aluminium is a unique metal: strong, durable, flexible, impermeable, lightweight and 100% recyclable.

In our modern world, tree density in primary forests varies from 50,000 – 100,000 trees per square km, so the math would put this number at 3.5 - 7 billion trees cut down each year. Deforestation affects the people and animals where trees are cut, as well as the wider world. In terms of climate change, cutting trees both adds carbon dioxide to the air and removes the ability to absorb existing carbon dioxide.

WE OFFER THREE OPTIONS TO OUR CLIENTS:

No.1 EASY PURCHASE

You can purchase from us

- long length aluminium extrusions OR easy install self-clipping systems, and
- other wood grain finished products

Cladding extrusions and Cladding Coil	pages 6 and 10

WE MAKE ALL THAT YOU NEED

MAINTENANCE OF YOUR WOOD LOOK PRODUCT

Maintaining your wood grain product is very effortless.
Maintenance does not require much time allowing you to focus on what matters to you more.

WOODonALI products do not require re-staining, re-coating or re-sealing.
We do however recommend doing a clean of your aluminium products every one to two months.
A simple wash down with a mild solution of fresh water and pure soap
(or mild non-abrasive kitchen detergent in warm water).

CARE FOR YOUR WOOD LOOK PRODUCT

No matter what aluminium product you purchased, you need to ensure there is a level of care taken with that product. Should you spill some paint or chemicals on any wood finished aluminium product, we advise removing these stains as quickly as possible with fresh water.

We never recommend using any solvents.
Strong abrasive household cleaners and thinners are harmful to the finished product.
